**Remember me Mrs V? Caring for my wife: her Alzheimer's and others' stories.** By Tom Valenta

Valenta, a former journalist, tells his very personal story of looking after his wife, Marie, as well as the stories of thirteen other carers who have been on similar journeys.

**When Breath Becomes Air.** By Paul Kalanithi

At the age of thirty-six, on the verge of completing a decade's training as a neurosurgeon, Paul Kalanithi was diagnosed with inoperable lung cancer. One day he was a doctor treating the dying, the next he was a patient struggling to live.

When Breath Becomes Air chronicles Kalanithi's transformation from a medical student asking what makes a meaningful life into a neurosurgeon working in the core of human identity - the brain - and finally into a patient and a new father.

Paul Kalanithi died while working on this profoundly moving book, yet his words live on as a guide to us all. When Breath Becomes Air is a life-affirming reflection on facing our mortality and on the relationship between doctor and patient, from a gifted writer who became both.
